Take this measurement with the slip yoke in its operating position. The slip yoke operating position is typically determined by pulling the slip yoke out of the transmission 1" after it is fully bottomed out.

## MDL CARBON FIBER DRIVESHAFT ORDER FORM

1350 U-JOINTS - 3.2" Dia. / JJC-AC0320

#### **PAYMENT & LEAD TIME**

50% **non-refundable** deposit required on all custom driveshaft orders before production begins. The approximate lead time for a custom driveshaft is 2 weeks from receipt of completed order form, unless otherwise indicated in writing from MDL.

#### **LEGAL DISCLAIMER NOTICE**

This composite driveshaft product and related components are sold as-is without any warranty whatsoever, expressed or implied, including but not limited to any implied warranties of merchantability or fitness for a particular purpose. MDL assumes no responsibility or liability for the selection, installation or any use of the products. The end user and any person who installs this product and related components are solely responsible for determination of the suitability of the product and components selected. The end user installs and uses the products and components at their own risk and agrees to fully indemnify MDL against any claims, damages or losses resulting from the selection, installation or use of the products or related components.

#### MODERN DRIVELINE IS NOT RESPONSIBLE FOR IMPROPER OR INCORRECT INFORMATION PROVIDED BY CUSTOMER.

#### **ALL SALES FINAL**

Warning: Be sure to inspect all components regularly, especially following a crash. Do not use any components which may have been

damaged.

Warning: If composite driveshaft is dropped or damaged, it should be taken out of service and replaced.

Only experienced and qualified persons should install the products and components. Failure to properly install the product or related components may result in vehicle damage, personal injury or death.
